Analyze

AI Journey

Exploring | Planning | Realizing | Scaling

Actionable Lab

Analyse your organization's use cases, requirements, & objectives. Plan for revenue growth, cost savings & innovation.

Proof of Concept

In one week, we go from prioritized use case to an exploratory PoC.

Functioning Prototypes

Prove your solution – see how it solves the business problem. Test, learn, then scale.

Enterprise Build

SaaSberry provides a team to build + deliver for specific project or business goals.

Art Of The Possible

Rapid Exploration to ROI through SaaSberry's Art of the Possible

Leverage our expertise
This rapid collaboration with key positions in your operations will arrive at a high value, high feasibility use case.

Expertise

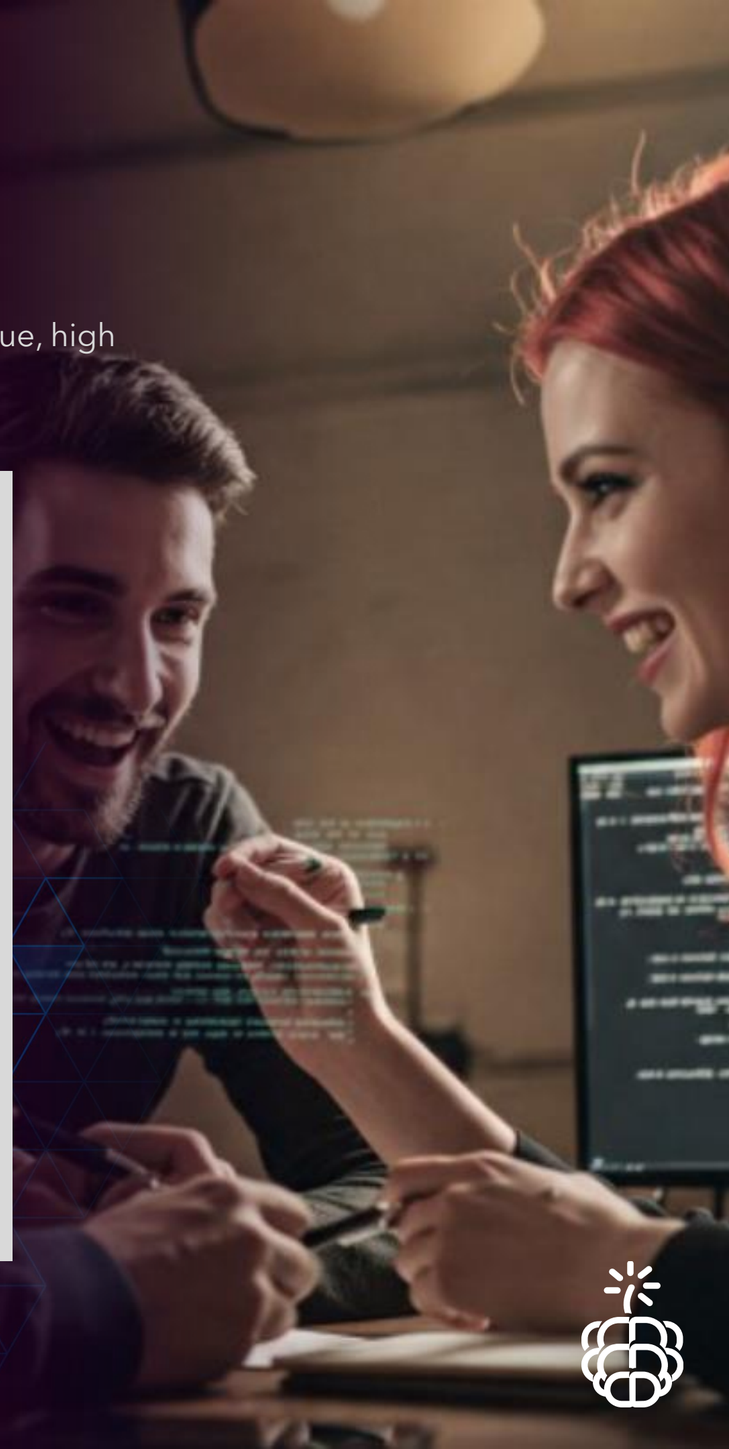
Direct collaboration with our AI expert

Use Case Analysis

Rapid iteration + development of use cases

Outcome

The 'how-to' for ROI driven use case



AI Agent Lab

Unlock Productivity with Our AI Agent Actionable Lab

Transform your business in just one session
Exclusive in-person session designed quickly to identify and plan a custom AI agent solution.

Explore AI

The right use case for your business

Understand Challenges

Collaborate

Plan

Ideate AI Agent solutions

Outcome

Actionable next steps

AI Agent PoC

Accelerate Now with SaaSberry's AI Agent Proof of Concept

In just one week ...
Uncover your organization's highest-impact opportunity with our rapid use case lab. We'll guide you from a sea of possibilities to a clear, prioritized path forward, demonstrating both high value and feasibility. In just one week, our Proof of Concept (PoC) experiment will validate your chosen direction, delivering a powerful "aha!" moment and igniting your next strategic move.

Prioritize

Identify & prioritize use cases.

Design

Design PoC aligned to use case & business objective.

Build

Develop + Ideate PoC.

Roadmap

Build & implementation plan.

Outcome

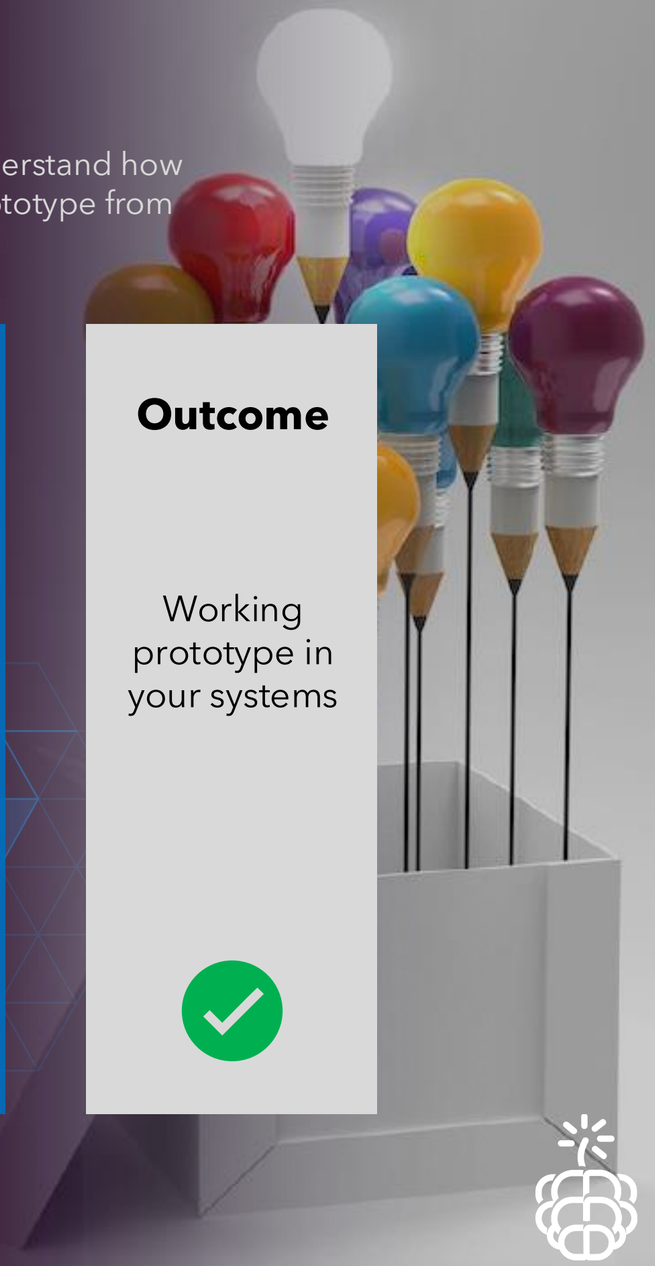
AI PoC for your team to explore. Tangible roadmap for next steps.

AI Agent MVP Prototype

Transform Your Business with SaaSberry's AI Agent Functioning Prototype (MVP)

Unlock the Power of AI with SaaSberry

At SaaSberry, we build custom AI solutions that drive efficiency and innovation. We understand how enterprises operate. Let our team of experts develop an AI Agent **functioning** MVP prototype from concept to implementation.



Discovery

Analysis of your data, workflows and processes

Use Case Analysis

Find your best AI use case

Build

Develop + Ideate AI Agent solutions

Iterate

Test and fine tune

Outcome

Working prototype in your systems

Revolutionize Your Organization with SaaSberry's AI Agent Enterprise Build

Empower Your Business with AI-Driven Productivity
From Prototype to Production! At SaaSberry, we provide tailored AI solutions and expertly implement autonomous AI agents to enhance your organization's productivity and innovation.

AI Agent Enterprise

Prototype to Launch	Data Planning	Risk + Guardrails	Build	Iterate	Testing	Outcome
Plan for wide rollout	Analyze requirements & benefits of scaling	Plan & implement risk management	Engineering the autonomous AI agent	Feedback and fine tune	Requirements & user acceptance testing	Working prototype In your systems

Success With SaaSberry

Why Choose SaaSberry?

Expertise

Leverage our extensive experience in AI and custom software

Innovation

Cutting-edge technology, backed by Microsoft, tailored to your business

Results Driven

Measurable results, Clear business objectives.

Nest! BANK

AI At Work

Nest Bank adopted Microsoft Copilot for Microsoft 365, freeing up the minds of its employees from administrative burdens and gaining a new level of efficiency in daily workflows. With Copilot, employees revolutionized how they prepare for, run, and follow up on meetings, as well as how quickly they develop new ideas.

Case Study

Challenge

Data Management: Faced difficulties in managing and analyzing vast amounts of customer data effectively.

Customer Insights: Need deeper insights into customer behavior to improve service offerings and personalization.

Operational Efficiency: Need to streamline operations and reduce costs while maintaining high service quality.

Strategy

Focus on leveraging **data analytics and AI** to enhance banking services.

Personalization: Analysis of customer behavior improves customer engagement, and more personalized banking experience.

AI Integration: Copilot allows for innovative solutions that enhance decision-making and service delivery.

Streamlining Processes: AI helps automate and optimize banking operations, reducing costs while maintaining high service quality.

Results

Improved Services: The solutions led to more personalized banking experiences for customers.

Increased Efficiency: The bank achieved greater operational efficiency and cost savings.

"Creating workshop materials now takes five minutes instead of an hour. "

Przemyslaw Buraczyński: Director of Transformation Department
Nest Bank

Case Study

AI At Work

H&R BLOCK®

H&R Block is using Microsoft technology to transform the tax filing experience. With AI-powered services, H&R Block tax professionals can spend more time building meaningful, personalized client experiences.

Challenge

Manual Processing Significant delays and errors due to the manual handling of tax documents.

High Volume Needed to efficiently manage surge during tax season.

Customer Experience Reduce customer frustration from long document processing time.

Resource Allocation Inefficient processes led to misallocation of resources, impacting overall productivity.

Strategy

Automation Leveraged Azure AI to automate data extraction from tax documents, reducing manual effort and errors.

Scalability Azure infrastructure and tools facilitated high volumes processing for demands of peak tax season.

Continuous Improvement Feedback loop lead refinement based on user experiences and operational needs.

Customer Experience Improved turnaround times for clients, increasing satisfaction and trust.

Results

Improved Workflow Azure AI enabled automation of data extraction from tax documents, significantly improving efficiency and accuracy.

Service Transformation Allowed H&R Block to streamline operations and focus more on customer service, ultimately enhancing their competitive edge in the market.

"It's our job to make sure that we're proactively evolving our approach to taxes. Technology allows us to do that and helps us put our clients in the driver's seat. "

Erika Algarin: Director of Assisted Tax Transformation
H&R Block
